

## What people exemplify how this STS formation has developed over time?

Jarita Holbrook is currently an associate professor of physics at the University of the Western Cape (UWC), South Africa. She recently finished a year as an American Association for the Advancement of Science (AAAS) & Technology Policy Fellow in NSF's Office of International Science and Engineering. She is an expert on Indigenous Astronomy and the principal investigator of the Astronomy & Society group at UWC. Her intellectual interest in African cultural astronomy has resulted in academic positions in applied anthropology and women and gender studies before her returning to physics.

### Jarita Holbrook STS in "Africa" in Formation

Okune, Angela. 2018. "Jarita Holbrook." In STS in "Africa" Personal Careers. In STS in "Africa" in Formation, created by Angela Okune and Aadita Chaudhury. In STS Across Borders Gallery Exhibit, curated by Aalok Khandekar and Kim Fortun. Annual Meeting of the Society for Social Studies of Science. Sydney, Australia. Aug 30-31.
